COASTGUARD BY PAINTSMITHS

SUPERIOR MARINE & COASTAL DEFENSE COATING

A premium finishing coat built on a blend of highly flexible pure acrylic polymers reinforced with structural fibres. It dries to a sophisticated, finely textured surface with a subtle slight sheen.

CLIMATE STRENGTHS & LIVING STRENGTHS:

- **Advanced Waterproofing & Flex:** The internal fibre reinforcement gives it outstanding waterproofing and flexible crack-bridging properties. It moves smoothly with the substrate, making it ideal for weatherproofing the tops of exposed plastered walls, window sills, and small architectural ledges.
- **UV & Salt Stain Retention:** Formulated to offer extremely low salt retention and high washability, allowing exterior facades to shed coastal salt grime easily.

COLOUR & ECO RANGE: Available in White, Pastel, and Deep bases matching the Midas 424 colour range (tinted at point of sale). Engineered as an eco-conscious exterior shield, it features high-performance, marine-safe properties to handle coastal elements responsibly.

PAINTSMITHS MIDALUX 240

PREMIUM MULTI-SURFACE LOW-SHEEN PURE ACRYLIC TOPCOAT

An environmentally friendly, premium-quality pure acrylic finishing coat that dries to an extremely durable, stain-resistant, and highly washable low-sheen finish. Conforms strictly to GBCSA environmental requirements and EU 2010 targets.

CLIMATE & LIVING STRENGTHS:

- **Multi-Surface Versatility:** Excellently suited for both INTERIOR and EXTERIOR surfaces. It is ideal for high-traffic areas such as passages and walkways, as well as subtly primed sand/cement plaster, concrete, fair-faced brickwork, and gypsum plaster. High Washability: Offers a highly washable, protective film that resists staining and everyday marking, though note it has medium resistance to burning if rubbed aggressively.

COLOUR & ECO RANGE: Available in White, Pastel, Medium, and Deep bases covering the full Midas 424 colour range. This is a highly green, eco-accredited option that strictly conforms to the Green Building Council of South Africa (GBCSA) environmental requirements and European Union 2010 targets.

Want a little bit of colour or texture on the inside?

ELEVATE YOUR SPACE WITH EARTHCOTE ARTISAN FINISHES

While protecting your exterior from the harsh coastal elements is vital, true architectural distinction lives on the inside, and nothing sets a home apart quite like the Earthcote collection. Designed to transform standard surfaces into breathtaking statements of luxury, Earthcote is the ultimate designer choice for high-impact feature walls and rich pops of color that catch the light with organic depth. Don't just paint your walls—turn them into pieces of custom art that instantly elevate your property's character leagues above the rest.
